SUMMARY

Electronics and Communication Engineering graduate with hands-on experience in Salesforce development, Java, SQL, and web technologies. Skilled in Apex, Flows, Salesforce automation, and problem-solving. Completed internships and projects involving cloud-based application development and inventory management systems. Seeking an entry-level Software Engineer or Salesforce Developer role to contribute technical skills and grow in a professional environment.

EDUCATION

Bachelor of Technology — Electronics and Communication Engineering
Aditya Institute of Technology and Management

Nov 2021 – Apr 2025
Aggregate: 82%

TECHNICAL SKILLS

Languages	C, Python, Java
Web Development	HTML, CSS
Database	SQL, MySQL
Tools	Git, GitHub, VS Code
Salesforce	Apex, Apex Triggers, Flows, Lightning Web Components (LWC), SOQL
Data Structures & Algorithms	Arrays, Linked Lists, Stacks, Queues, Trees (Basics), Sorting & Searching

WORK EXPERIENCE

Programming & Web Development Instructor | Degree College

- Delivered structured lessons on Python, HTML, CSS, SQL, and JavaScript to final-year engineering students.
- Conducted 100+ hands-on coding sessions and practical assignments, improving student project outcomes.
- Guided students in developing responsive web applications and database-driven projects from scratch.
- Mentored students in debugging techniques, logical thinking, and writing clean, structured code.

Salesforce Developer Intern | Smart Bridge

- Developed Apex classes and triggers to automate complex business logic and streamline data processing.
- Built record-triggered Flows for workflow automation, reducing manual operations and improving efficiency.
- Gained hands-on experience in Lightning Web Components (LWC) for UI development on the Salesforce platform.
- Understood CRM architecture and practiced cloud-based application deployment in Salesforce environment.

PROJECTS

Portfolio Website

- Developed a personal portfolio website showcasing projects, skills, certifications, and internship experience.
- Implemented responsive design, dark/light mode, and smooth animations.
- Deployed using Vercel and integrated GitHub and LinkedIn profiles.

Smart Asset & Inventory Management System

- Created custom objects and relationships for asset and inventory tracking.
- Developed Apex classes and triggers for automation and validation.
- Used SOQL queries for data retrieval and reporting.
- Built reports and dashboards to monitor inventory utilization.
- Implemented email notifications for low-stock alerts.

Area-Delay-Power Efficient VLSI Architecture of FIR Filter for Seismic Signal Processing

- Designed hardware-efficient FIR (Finite Impulse Response) filters for real-time seismic signal processing, optimizing for area, delay, and power consumption simultaneously.
- Implemented innovative algorithms to minimize logic operators and reduce critical-path delays, improving overall circuit performance and resource utilization.
- Successfully deployed and validated filter designs on both FPGA and ASIC platforms, demonstrating end-to-end hardware design and verification skills.

Amazon Website Clone

| *HTML* | *CSS*

- Developed a fully responsive e-commerce homepage clone replicating the Amazon UI layout.
- Implemented structured and semantic HTML with modular CSS for reusable, maintainable components.
- Achieved cross-browser compatibility and mobile responsiveness using CSS Flexbox and Grid.

CERTIFICATIONS

- Salesforce AI Associate — Salesforce
- Introduction to Python — Great Learning
- Introduction to Java — Great Learning
